

## Announcement!

We are pleased to announce that the 2018 Impact Factor for T-PS has increased again and now stands at 1.325!

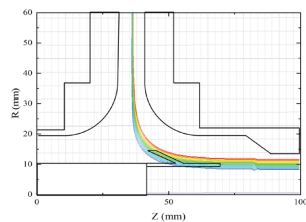

## Features in This Issue

### Repetitive Gas-Discharge Closing Switches for Pulsed Power Applications

by Longjie Li, Zheng Zhao, Yuhao Liu, Chenjie Li, Jiarui Ren, and Jiangtao Li

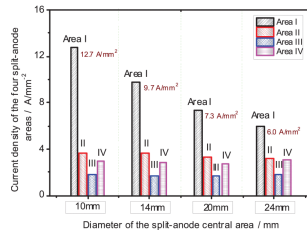

[Read More](#)

### A Dual-Frequency High-Power Microwave Generator

by Huida Wang, Wei Song, Renzhen Xiao, Chenchen Tong, and Xiaoze Li

[Read More](#)

### Experimental Determination of the Current Constriction Characteristics at the Anode of AMF Vacuum Arcs

by Hui Ma, Zhiyuan Liu, Yingsan Geng, Jianhua Wang, Zaiqin Zhang, and Xiangwen Xiao

[Read More](#)

PART I OF FOUR PARTS

SPECIAL ISSUE ON PLASMA, INVITED AND SELECTED PAPERS FROM THE 2018 ASIAPACIFIC CONFERENCE ON PLASMA AND TRANSMISSION SCIENCE

Special Issue on Plasma, Invited and Selected Papers From the 2018 Asia-Pacific Conference on Plasma and Transmission Science

1855

Electromagnetic Compatibility in Electron Cyclotron Resonance Heating Systems

1857

Characterization of a Resonant Far-Field Heating System in a Tokamak

1865

A Numerical Point-Grid Method for the Simulation of Electron Discharge in a Tokamak

1868

Effect of Nitrogen Addition on Electron Density and Temperature of Cooled Argon Discharge Plasma Disrupted by Laser-Driven Substrate

1874

Thomson-Scattering Properties of Negative Discharge Channels

1880

Effect of High-Voltage Electric Interruption on the Structure of the Plasma

1887

Discharge Modes of Electrical Experiments of Alkali-Air Fuel Cells

1928

Positive Ion Velocity and Discharge Current Considering Ionospheric Density Depletion at Perseus

1935

Experimental Investigation on a Multibeam Electron Beam Discharge System

1944

Impact on the Dynamic Model of Plasma Ignition Process of a Fuel Injector

1950

Effect of Frequency on Arc Motion in Multiple-Pinpoint Contact System

1957

Nonresonant Penetration of Contact Discharge Characteristics Under Different Ambient Pressures

1964

Some Advances in Theory and Experiments of High-Frequency Vacuum Electron Devices in China

1971

# Science

## A publication of the IEEE Nuclear and Plasma Sciences Society.
