

Features in This Issue

Electromagnetic Simulations of Mechanical Imperfections for Accelerator Cavities

by Anil Karatay, and Fatih Yaman

[Read More](#)

CDP1—A Data Concentrator Prototype for the Deep Underground Neutrino Experiment

by Sandeep Miryala, Davide Braga, David C. Christian, Grzegorz W. Deptuch, Ping Gui, James R. Hoff, Scott Holm, and Xiaoran Wang

CONTENTS

Electromagnetic Simulations of Mechanical Imperfections for Accelerator Cavities A. Karatay and F. Yaman 2201

Statistical Analysis of Mechanical Imperfections for the Nuclear Electrostatic Accelerator S. Miryala, D. Braga, D. C. Christian, G. W. Deptuch, P. Gui, J. R. Hoff, S. C. Holm, X. Wang, and F. Yaman 2209

Design of a High-Capacity Data Concentrator for the Deep Underground Neutrino Experiment S. Miryala, D. Braga, D. C. Christian, G. W. Deptuch, P. Gui, J. R. Hoff, S. C. Holm, X. Wang, and F. Yaman 2217

Simulation of the Performance of a Deep-Underground Neutrino Experiment S. Miryala, D. Braga, D. C. Christian, G. W. Deptuch, P. Gui, J. R. Hoff, S. C. Holm, X. Wang, and F. Yaman 2225

Simulation of the Performance of a Deep-Underground Neutrino Experiment S. Miryala, D. Braga, D. C. Christian, G. W. Deptuch, P. Gui, J. R. Hoff, S. C. Holm, X. Wang, and F. Yaman 2233

Simulation of the Performance of a Deep-Underground Neutrino Experiment S. Miryala, D. Braga, D. C. Christian, G. W. Deptuch, P. Gui, J. R. Hoff, S. C. Holm, X. Wang, and F. Yaman 2241

IEEE Transactions on Nuclear Science

A publication of the IEEE Nuclear and Plasma Sciences Society.
