

Featured Articles

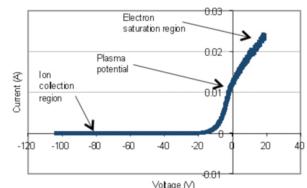

Design and Experiment of a Hollow Beam Electron Optics System for Ka-Band Extended Interaction Klystrons

by Chao Zhao, Ding Zhao, Yong Wang, Qingsheng Li, Xiaowan Hou, Wei Gu, and Qianzhong Xue

[Read More](#)

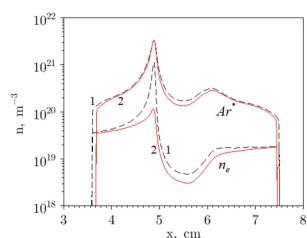

High Voltage Solar Array Development for Space and Thruster-Plume Plasma Environments

by Dan M. Goebel, and Olya S. Filimonova

[Read More](#)

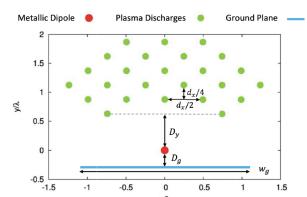

Modeling of Ionization Waves in Atmospheric-Pressure Argon in a Long Gap

by Dmitry V. Tereshonok, Natalia Yu. Babaeva, Georgy V. Naidis, Artem G. Abramov, and Aleksandr V. Ugryumov

[Read More](#)

Design of a Hybrid Metal-Plasma Transmit-Array With Beam-Scanning Capabilities

by Giulia Mansutti, Paola De Carlo, Mirko Magarotto, Mohammad A. Hannan, Paolo Rocca, Antonio-D. Capobianco, Daniele Pavarin, and Alberto TuoZZI

[Read More](#)

EDITOR-IN-CHIEF:
John F. Foster, Jr., Full and Part-time Journal Plasma
Sciences Department, University of Wisconsin-Madison, Madison, WI 53706
Associate Editors:
S. J. Benner, M. C. Goldstein, and V. Vaynshteyn
Wen-Ching Chen, Institute of Water Resources, Hydrology and Soil Conservation, Hsinchu, Taiwan 311-0001
Cengiz Ertekin, University of Texas at Austin, TX 78751
J. P. Frey, University of Colorado Boulder, CO 80309-0438
A. G. Kondratenko, Institute of Space and Astronautics, Long Gop, Vietnam
C. Joshi, C. Raman, and C. Mervier
On Electron Spraying of Salts
R. D. Lathouwer, N. T. Anderson, G. Y. Nield, A. G. Adams, and A. V. Yaroshenko
Modelling of Ionization Waves in Atmospheric Pressure Argon at Low Gas Flow Rates
Y. Li, X. Wang, and S. C. Lee
Nonisothermal Flow in the Structure of a Current Shock Wave Relaxed Ion an Ionosphere-Based Multidimensional Model
Numerical Study on Optimum Optimisation of Atmospheric Radio-frequency Glow Discharges - Modulated Frequency and Pulse Width
Evaluation of the Dodgey Mode Power Chain as an Inverse Period Doubling Relaxation in an Atmospheric Pressure Glow Discharge
Microwave Generation and Microwaves-Plasma Interaction
A. V. Yaroshenko, A. V. Kondratenko, and S. V. Kondratenko, Nonlinear Skin Wave Structure Based on Particle-in-Cell
Study of the π -Mode Operation in the Extended Interaction Circuit
A. V. Yaroshenko, A. V. Kondratenko, and S. V. Kondratenko, Nonlinear Skin Wave Structure Based on Particle-in-Cell
Study of the π -Mode Operation in the Extended Interaction Circuit
J. Chang, G. Shi, L. Guo, and P. Chen
A. Dong, A. Ge, F. Deng, L. Meng, R. Oli, Z. Zhou, J. He, and J. Zhang
Design of a Hybrid Mesh-Plasma Transformer
G. Mazzoni, P. De Carlo, M. Maggiore, M. A. Roman, P. Ricca, A. Di Capua, D. Proietti, and A. Pucci
G. Mazzoni, P. De Carlo, M. Maggiore, M. A. Roman, P. Ricca, A. Di Capua, D. Proietti, and A. Pucci
(Continued from back cover)

Science

A publication of the IEEE Nuclear
and Plasma Sciences Society.
